

created by: Rainer Bemsel - Version 1.0 - Dated: July/12/2003

The purpose of this document is to describe the steps to follow for manual updates of Virus Definitions and Attack Definitions.

**Note:** Virus & Attack Definitions can be updated automatically, as well. You can define following values regarding Automatic Update Schedule:

- Every <hours> <minutes>
- Daily <hour> <minutes>
- Weekly <day> <hour> <minutes>

This document describes only manually initiating antivirus & attack update.

- 1. Download the latest antivirus definitions and the latest attack definitions update files from Fortinet and copy them to the computer, you are using to connect to the web-based manager
- 2. Start the Web-based manager and go to System-Status

I reserve the right to modify, update, retract or otherwise change the information contained within for any and without notice. This technote has been created after studying the material and / or practical evaluation by myself. All liability for use of the information presented here remains with the user 2. To the right of the Antivirus Definitions section, select Definitions Update

Antivirus Definitions Version:	4.81(05/16/2003 15:24)	

3. Enter the path and filename for the antivirus definitions update file, or browse and locate the file

	Anti-Virus Definitions Update
Update File:	Browse OK Cancel

4. Select OK to copy the antivirus definitions update file to the FortiGate Unit

Anti-Virus Definitions Update	
Updated successfully.	

Go to System – Status to confirm that the AntiVirus Definitions Version information has been updated. In my case, I had following status:

Before Update: AntiVirus Definitions Version - 4.81 dated May/16/2003 After Update: AntiVirus Definitions Version - 4.104 dated July/10/2003

Use same steps to upgrade Attack Definitions.
